

The second LOCKDOWN can't and shouldn't happen.

Unless the government and MPs have good reason to do so, the second lockdown will be **ILLEGAL** for the government and for the police to enforce.

They claim their decisions are based on 'science', but here are the facts and the real science:

- They still count EVERY death within 28 days of a positive coronavirus test as a 'Covid death', regardless of cause of death eg. If you were admitted to hospital with a heart issue, they will test you for coronavirus, then if you die in 28 days, you will be counted as a 'Covid death'. The average number of deaths in the UK from all causes, even before the 'pandemic', was 1600 deaths per day. Some of these deaths are now being counted as 'Covid deaths' instead of from the true causes of death such as flu, cancer, heart attacks, drowning, suicide, etc.
- The PCR test they use for coronavirus will pick up any old coronavirus fragments in your system, eg. from a previous cold, and the test has a very high false positive rate. The vast majority of people who test positive are not sick, not contagious, won't need hospitalisation, and should never be counted as 'cases'.
- All positive 'cases' since they started testing in March 2020 are counted in the total cases, to scare you! On 31/10/20 the media reported the UK had over 1 million 'cases'. This is simply the total number of positive tests since the beginning of testing and includes everyone with a positive test even from many months ago, so is not accurate. When you factor in the high false positive rate of the PCR test, the vast majority of the published cases would not be cases!
- The only reason the graphs show rising positive 'cases' is because either only total number of cases are plotted (and because they keep doing more tests, number of cases will also rise), or because they show cases out of local population. Eg. If there are 20 cases out of a 1000 population in a village on one day, then 40 cases out of the same 1000 population the next day, this is NOT because cases have risen or spiked – it is simply because they did more tests in that village.
- It would be more meaningful and accurate if they reported on **the number of positive tests out of all tests done, which is under 5%**, even before you remove the false positives. But accurate statistics would scare people less, and their aim is to frighten you into compliance.
- The government relies on various official groups for advice, including the Behavioural Insights Team (BIT), Joint Biosecurity Centre (JBC), and others. Minutes released from meetings recommended that the public should be put into a state of fear in order to achieve higher compliance with coronavirus measures, such as 'social distancing' and wearing masks. The constant bombardment of numbers of 'Covid deaths' and 'cases' in the media, as well as the slogans with bright colours and three simple messages (eg. "Hands, Face, Space" and "Stay home, Protect the NHS, Save lives") are the outcomes of this advice. The government are treating us like little children.
- There is NO reliable science showing that masks stop viruses or deaths, but there are plenty of scientific studies, published in prestigious medical journals, showing that masks don't work and are in fact HARMFUL to wear. This is because frequent wearing of masks causes hypoxia (lack of oxygen), hypercapnia (too much carbon dioxide in your blood), headaches, shortness of breath, respiratory and viral infections (you will breathe any pathogens back into your lungs which were caught in the mask), and immune suppression (due to lack of oxygen, which means you are more likely to become ill from wearing masks).
- There is NO reliable scientific evidence to show that 'social distancing' stops viruses or deaths, and the government's own statistics show that the hospitals have NEVER been over-run throughout the 'pandemic'.
- The huge negative impacts of lockdowns and 'social distancing' include increasing mental health issues, rising suicides, closure of small/medium businesses, rising unemployment, total economic collapse, and high numbers of non-Covid excess deaths (compared to average deaths), especially amongst the elderly, due to untreated medical issues.
- The coronavirus vaccines currently being tested are being rushed through in months instead of years, and there have been a number of serious adverse events amongst trial volunteers (including death, paralysis, and other serious side effects). This is the same vaccine they want to inject into you. Studies show the flu vaccine is also harmful, and having both the flu vaccine and the coronavirus vaccine may make you very ill or kill you. Our immune systems have enabled human beings to survive without interference for millions of years. If you get enough vitamin C, vitamin D and zinc, you will give yourself a much better chance of not getting ill, without dangerous vaccines.
- Why are they doing this? The World Economic Forum (WEF) wants to instigate the so-called 'Great Reset', where they will wipe all debts. But there is a very high cost for humanity attached to this – many will die from the vaccines in a depopulation drive, your house/property will be seized, you will be constantly surveilled and controlled, you will need a negative coronavirus test and vaccine passport to be allowed access to anywhere including food shops, and any who refuse will be taken to internment camps and forced to agree to these measures or they will remain imprisoned indefinitely, or worse.

What can you do to stop the second lockdown and this madness?

- MPs may get to vote about the second lockdown on or before Wednesday 04 November 2020. If a majority of MPs vote for it, or there is no vote, the second lockdown will officially start on Thursday 05 November 2020. This will be devastating.
- **You need to write to your MP urgently asking them to stop this – the quickest way to do so is via the website <https://www.theyworkforyou.com/> (simply type in your postcode, which will give you the name of your local MP. Click on 'Send a message', type your message, then click 'Send' and confirm to deliver it immediately).**
- Sign petitions, attend protests, share information on social media. Talk to your family and friends. If you feel comfortable, do NOT comply with lockdown measures – **DO WHAT YOU FEEL IS RIGHT and not what you're told to by this incompetent and increasingly criminal government, who do NOT have your best interests at heart.**
